

**Preventative
Maintenance
Solutions**

Why choose SMS Equipment Preventative Maintenance?

Keeping your equipment in healthy running condition through an effective and professionally planned maintenance program actually costs less over the life of your machine.

Preventative maintenance will be completed during scheduled intervals to ensure that your equipment continues to operate at its peak level of performance.

What's in it for you?

- Your inspections will be performed by a trained technician
- Your equipment will have less downtime as a result of having a planned maintenance schedule
- Your equipment will be assessed to identify arising issues before turning into more costly repairs

KOWA

SMS Equipment supplies an oil sampling service to our customers called KOWA. This service utilizes a laboratory to analyze the essential fluids being used in your machines. Whenever we take a fluid sample, we send it out to be analyzed. After it has been analyzed the results will be available on the KOWA site. Often these results will help us identify the root cause of problems well before they happen.

Preventative Maintenance Programs (PM's)

SMS Equipment offers a two-tiered contract system to better serve your PM requirements.	ESSENTIAL (Customer Completes PM)	GENUINE
Fluid analysis bottle supplied at every interval and access to all oil sample reports	●	●
Fluid analysis at recommended scheduled intervals	●	●
Intervals scheduled by SMS Equipment employee based on equipment usage		●
PM Machine Inspection		●
Flexible Payment Plans (Cost per hour, per interval or one time payment)		●
Komatsu Genuine Oil		●
PM parts shipped by SMS Equipment to location based on equipment usage for the customer to complete the PM interval	●
