Oil Drip Carts

Eliminate spillage using these low-profile aluminum oil carts. With heavy duty handles, 4 oil-resistant swivel casters, these oil carts are very easy to maneuver and will fit under any size of equipment. Removable bar grating top that also serves as a work platform.

Engineer certified for 300 lbs (136 kg).

Multi Handler & Attachments

Multi Handler's certified heavy-duty frame can hold 50 tons (45 MT). The Multi Handler is computer controlled, wireless radio remote operated and available in diesel, DC battery or AC powered models.

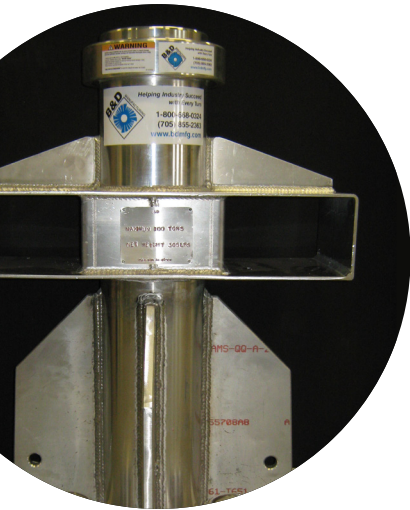

Swing Shaft Changers

Swing Shaft Changers offers an efficient, safe solution for the replacement and servicing of swing shafts on P&H 2300, 2800, and 4100 shovels. Swing Shaft Changers have the capacity to lift and support 7,000 lb (3175 kg) load.

Evolution Jack & Lifting Attachments

Improving safety while increasing production. The engineered EJ200 Jack is very compact, quicker to position, remote control, & operator friendly. Features like a 200 tonne capacity, a two point lifting system and the remote control keep your workers away from the lifting areas, and greatly reduces the risk of injury.

Stands

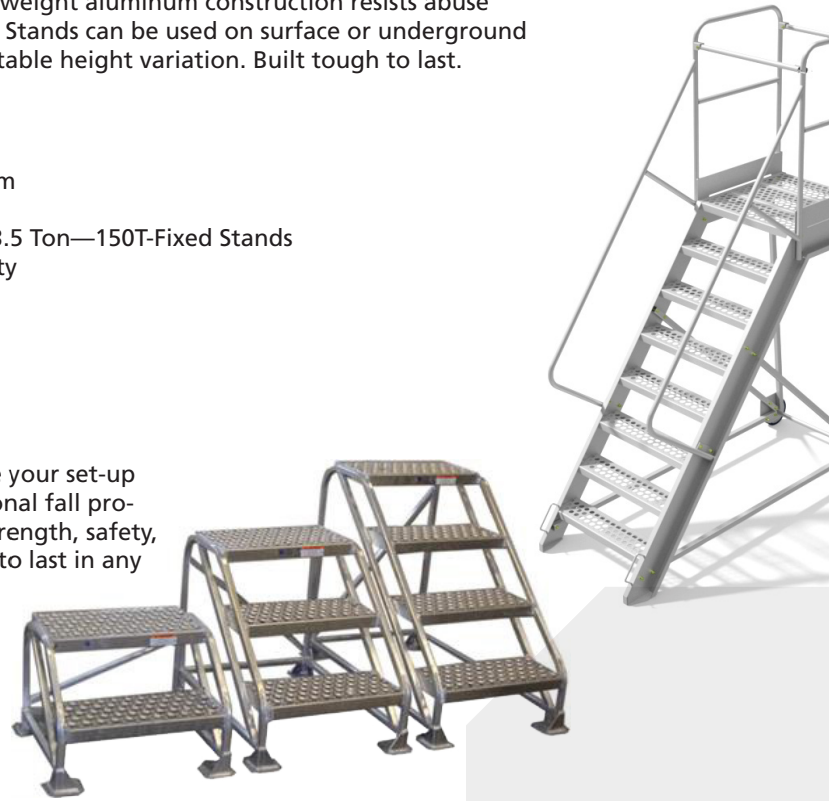

When working on heavy machinery you need incredibly sturdy and dependable equipment. These heavy duty stands maintain a safe working environment and are engineered so you can rest assured that all aspects of worker safety is met. The lightweight aluminum construction resists abuse from oil, salt and the weather. Stands can be used on surface or underground equipment, in a fixed or adjustable height variation. Built tough to last.

Features

- Engineered Certified
- Lightweight, HD Aluminum
- Heights 12" to 96"
- Weight Capacities from 13.5 Ton—150T-Fixed Stands
- Stamped with load capacity
- Serialized

Stairs & Platforms

Aluminum stairs and step platforms are engineered to decrease your set-up times and increase production by minimizing the use of traditional fall protection equipment. Designed to exceed industry standards in strength, safety, stability and product durability, these light-duty steps are built to last in any industrial application.

Body Blocks

Newly Designed Body Blocks. Available in three heights 8", 12", & 16". New swivel top has 10 degrees of swivel to allow for easy block placement on the frame.

- Engineer certified
- Safely support the dump body by placing a Body Block between the frame and body during maintenance
- Must be used in pairs

AM-1424 Align Boring Kit

Features

- Boring Range: 2 ¼" - 16"
- Rugged, reliable and heavy duty
- Flow thru bar design - allows for set-ups between bores
- On-site or in-shop operation
- Choice of variable speed or quick-change fixed speed power
- Adjustable mounting system for operator ease
- Remote pendant control
- Boring bars are chrome plated for extra hardness and straightened for improved machining
